

recycling tree outline

leaves outline

to use:

1. Any student who brings in a recycled item gets to sign the **Recycling Tree** or students can be provided with a leaf that can be glued to the tree.
2. When the promotion is over the **Recycling Tree** can be laminated, (*this could be a start of an annual **Recycling Tree** promotion*) which can grow and be a permanent part of the **Recycling Tree Forest**.

instructions:

1. Print out this sheet for your template.
2. Copy to a transparency.
3. Tape butcher paper to wall, adjust tree size to your liking with an overhead projector, trace, cut and glue onto poster board or hang on bulletin board.
This could be done with an art class, student council, or any group of kids. More involvement from students will create a more supportive/recycling student body.
